

# Landslide Inventory Map of Chuuk Islands Affected By Typhoon Chata'an

By

Edwin L. Harp, Mark E. Reid, and John A. Michael  
2004

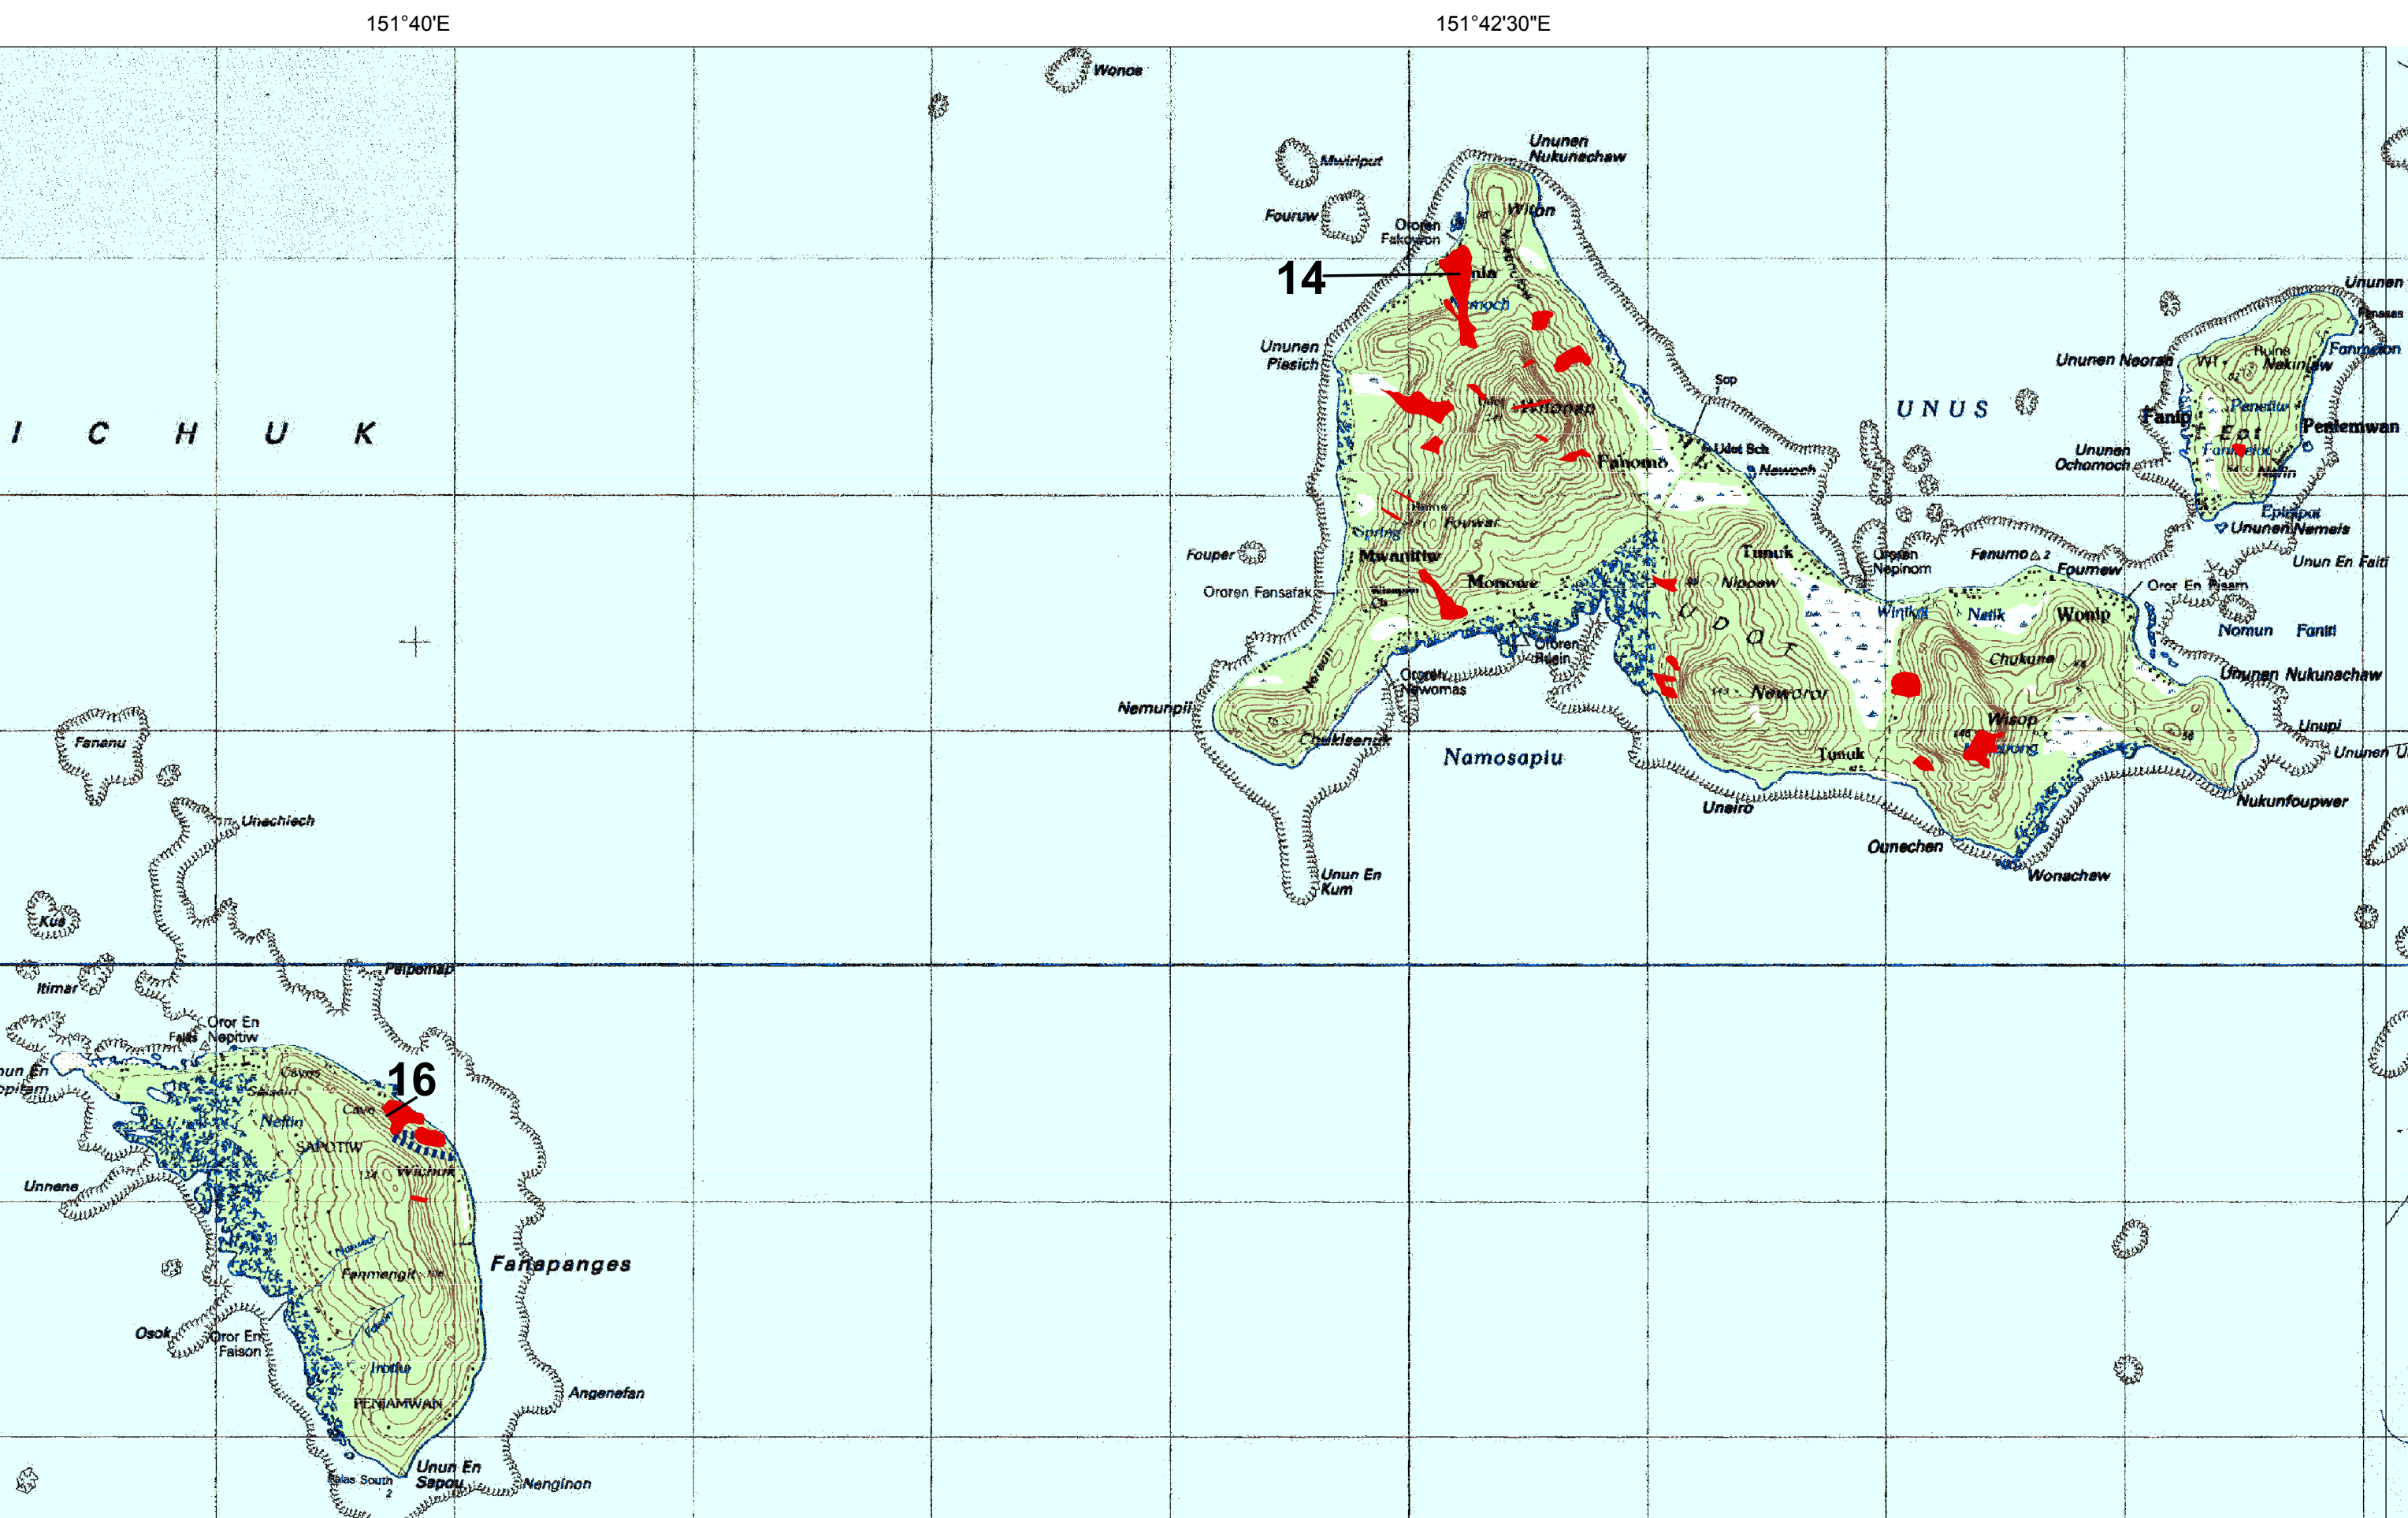

## EXPLANATION

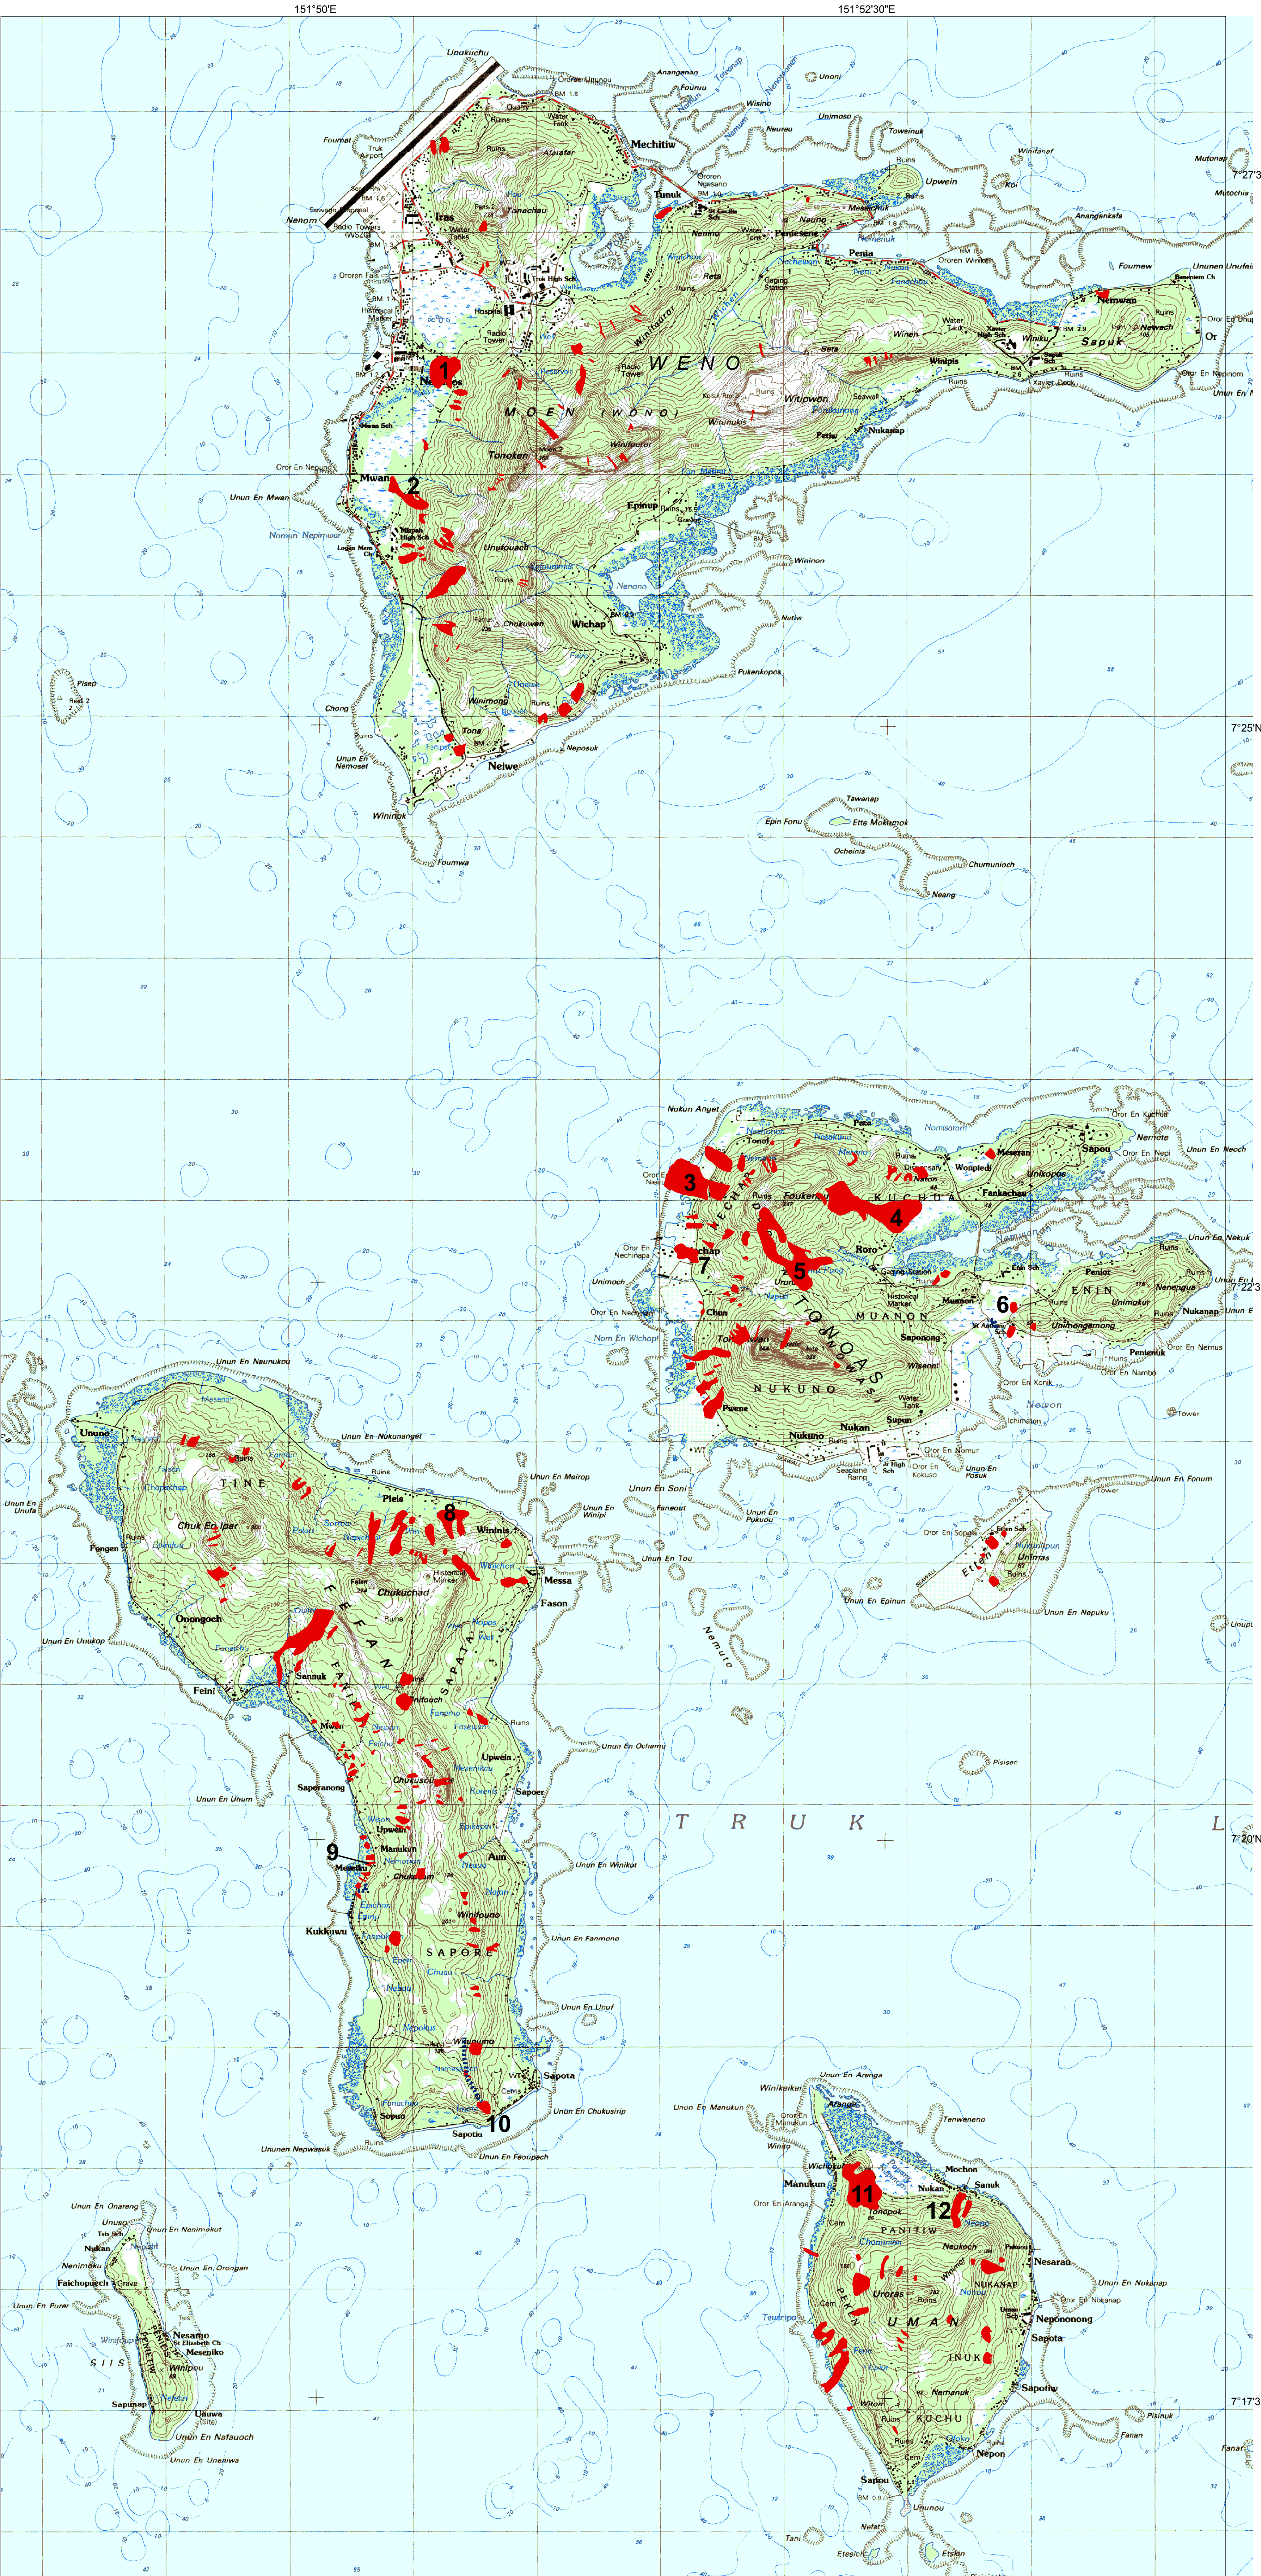

- Landslides triggered by Tropical Storm Chata'an
- Number corresponds to significant landslides listed in Table 2
- Incipient landslide cracks

Contour Interval 10 Meters  
Scale 1:25,000  
0 1 2 3  
Kilometers  
0 1 2 3  
Miles

Open-File Reports are used for the dissemination of information that must be released immediately to fill a public need or for information that is not sufficiently refined to warrant formal publication. As such, Open-File Reports should not be viewed as final reports of major scientific investigations. Because of their preliminary nature and possibility of being superseded, Open-File Reports do not introduce new or revised geologic, stratigraphic, hydrologic, or taxonomic nomenclature. In particular, Article 4(a) of the North American Stratigraphic Code excludes open-file releases for the naming or revising of formal geologic units.

Topographic base materials were scanned from maps originally produced by the U.S. Geological Survey, 1983.
